

# Add-ins Deployment Guide

SOFT4Leasing Release SL63

## 1. DropAreaControl add-in

Add-in allows to implement document Drag & Drop function. Currently it is used in Page 17021898 – “S4LA Doc. Bin FactBox” and some other pages. You must follow these steps to deploy the add-in:

1. Open the page Control Add-ins and insert new entry. Input the following values:
  - a. DropAreaControl in the field „Control Add-in Name“
  - b. **b33780e0a1cf8256** in the field „Public Key Token“
  - c. select JavaScript Control Add-in in the field Category
2. Import add-in resources file DropAreaControl.zip by selecting action Import on the ribbon.
